SAAS LANDING PAGES

Your landing page quote is probably missing these 6 things

The technical work that decides whether paid clicks turn into sign-ups.

MOST QUOTES SKIP

01 Mobile speed

Google treats a Largest Contentful Paint of 2.5 s or less as “good”. Hero images, video backgrounds and third-party scripts are the usual reasons pages miss it.

02 Ad landing page quality

If you run Google Ads, landing page experience is part of how Google judges your ads. A slow or off-message page costs you twice.

MOST QUOTES SKIP

03 Attribution

UTM parameters captured and passed through to the form or sign-up, so you can tell which campaign produced which lead.

04 Analytics events

CTA clicks, form starts, form submissions and sign-ups tracked as separate events, not just page views.

MOST QUOTES SKIP

05 Form delivery

Submissions going to the CRM or email tool your team actually uses, with a fallback notification and a tested thank-you state.

06 Indexing decisions

Campaign-only variants usually shouldn't compete with your main pages in search: decide what gets noindex or a canonical.

BEFORE YOU SIGN

Ask which of these 6 are included.

A quote that only prices the design isn't comparing like with like. Get the technical scope in writing.
